

A comprehensive Digital Asset Management (DAM) feature set that virtually any enterprise may use to manage rich media content in an affordable and highly secure environment.

Now, users can easily capture, manage, repurpose and publish rich media content using a scalable, integrated system on an outsourced basis. Integrated multimedia networking solutions are also available via Onstream Media's EDNET connectivity experts.

## Video@AOL

The screenshot displays the Onstream Video@AOL interface. At the top, there are navigation tabs for 'Packages', 'Assets', 'Assets', 'Publish', and 'Reports'. Below this is a filmstrip showing several video thumbnails. The main area features a video player with a progress bar and a 'Play' button. To the right of the player are fields for 'Start' and 'End' times, a 'Categories' dropdown menu, and a 'Submit Categories' button. Below the player, there is a 'File Info' section with a 'Description' field and a 'Publish/Unpublish/Revoke' button. At the bottom, there is a 'Metadata' section with fields for 'Start Date', 'End Date', and 'End Time'. The footer of the interface reads: '© Publishing '11 Build: 6889 © Copyright © 2010 by Onstream, Inc. All rights reserved.'

- Content Aggregation – 100 channels of news, sports, travel, weather, music, movies, autos, lifestyle, television and games.
- 24 x 7 Automated Data Feed Ingest
- Reel Creation
- Categorization
- Metadata Entry
- Thumbnail Selection
- XML-Formatted Export

### Fully Outsourced

Clients do not have to purchase or administer any hardware or software. Nor do they need to hire any additional web or content production staff for the video processing, site creation and hosting of their application and video content.
